ANSWER: Actavis admits that Actavis is a company organized and existing under the laws of the State of Florida. Actavis denies that Actavis has a principal place of business at Morris Corporate Center III, 400 Interpace Parkway Parsippany, NJ 07054. Actavis' principal place of business is located at 4955 Orange Drive, Fort Lauderdale, FL 33314. Actavis denies the remaining allegations of Paragraph 6 of the Complaint.

ANSWER: This Paragraph contains legal conclusions to which no answer is required. To the extent an answer is required, Actavis does not contest personal jurisdiction for purposes of this action only. Actavis denies the remaining allegations in Paragraph 10 of the Complaint.

11. Venue is proper in this District pursuant to 28 U.S.C. §§ 1391 and 1400(b).

XARTEMIS XR

12. XARTEMIS™ XR is an extended release tablet for oral administration. XARTEMIS™ XR contains the active ingredients acetaminophen and oxycodone. The recommended dose of XARTEMIS™ XR is one dose every 12 hours without regard to food. XARTEMIS™ XR is indicated for the management of acute pain severe enough to require opioid treatment and for which alternative treatment options are inadequate.

ANSWER: Actavis admits that the label for XARTEMIS™ XR states that it is an "extended-release tablet for oral administration." Actavis admits that the XARTEMIS XR label states that it contains the active ingredients acetaminophen and oxycodone hydrochloride. Actavis admits that the XARTEMIS XR label states that its recommended dose is "2 tablets

every 12 hours without regard to food." Actavis admits that the XARTEMIS XR label states that it "is indicated for the management of acute pain severe enough to require opioid treatment and for which alternative treatment options are inadequate." Actavis denies the remaining allegations in Paragraph 12 of the Complaint.

13. XARTEMIS™ XR combines an opioid analgesic with a non-opioid analgesic agent. XARTEMIS™ XR provides the advantage of additive and synergistic analgesic effects allowing for a lower dose of opioid, fewer side effects, and the ability to treat a broader spectrum of pain or pain states due to the different mechanisms of actions.

ANSWER: Actavis admits that the XARTEMIS XR label states that it contains the active ingredients acetaminophen and oxycodone hydrochloride. Actavis lacks knowledge and information sufficient to form a belief about the truth of the remainder of the allegations in Paragraph 13, and therefore denies each and every remaining allegation in Paragraph 13 of the Complaint on that basis.

14. Previously marketed drug products delivered the combination drugs as an immediate release product.

ANSWER: Actavis admits that previously marketed drug products, *i.e.*, prior art to the '681, '631, '885, '319, '975, '870, and '929 patents, delivered a combination of the active ingredients acetaminophen and oxycodone. Actavis lacks knowledge and information sufficient to form a belief about the truth of the remainder of the allegations in Paragraph 14, and on that basis denies them.

15. This limitation required the drug product to be administered frequently and/or continuously throughout the day (or night) for continuous pain relief. This frequent continuous dosing is often inconvenient and difficult to maintain. Regular dosing is, therefore, inconvenient and frequently leads to poor patient compliance – potentially resulting in a dose being taken after pain breaks through, causing unnecessary pain and suffering.

ANSWER: Actavis admits that previously marketed drug products, *i.e.*, prior art to the '681, '631, '885, '319, '975, '870, and '929 patents, delivered a combination of the active ingredients acetaminophen and oxycodone. Actavis lacks knowledge and information sufficient to form a belief about the truth of the remainder of the allegations in Paragraph 15, and on that basis denies them.

16. During drug development, it was surprisingly discovered that a pharmaceutically acceptable gastric retentive dosage form can be formulated to provide release in the stomach of a combination of a sparingly soluble drug and a highly soluble drug at rates proportional to one another over an extended period of time.

ANSWER: Actavis lacks knowledge and information sufficient to form a belief about the truth of the allegations in Paragraph 16, and on that basis denies them.

17. In 2008, Mallinckrodt licensed Depomed patents, a patent application, and know-how and sought approval from the FDA to market XARTEMIS™ XR in the United States. The FDA approved Mallinckrodt's New Drug Application No. 204031 ("the XARTEMIS™ XR NDA") for oxycodone hydrochloride and acetaminophen extended-release tablets, under the trade name XARTEMIS™ XR, on March 11, 2014.

ANSWER: Actavis admits that the Orange Book lists NDA No. 204031 for XARTEMIS XR as being approved on March 11, 2014, and that the label for XARTEMIS XR states that it is an "extended-release tablet for oral administration." Actavis lacks knowledge and information sufficient to form a belief about the truth of the remaining allegations contained in Paragraph 17, and on that basis denies them.

18. As a part of the regulatory process for obtaining approval of the XARTEMIS™ XR NDA, Mallinckrodt was required by the FDA to submit a proposed label for the drug. See 21 C.F.R. § 201.56(b). The label for XARTEMIS™ XR instructs physicians and patients, *inter alia*, about the proper dosage and administration of XARTEMIS™ XR.

ANSWER: This paragraph contains legal conclusions for which no response is required. To the extent a response is required, Actavis admits that the FDA requires submission of

proposed labels for drug products. Actavis lacks knowledge and information sufficient to form a belief about the truth of the remaining allegations contained in Paragraph 18, and on that basis denies them.

19. The label for XARTEMIS™ XR indicates, *inter alia*, that one dose of XARTEMIS™ XR is recommended twice daily.

ANSWER: Actavis admits that the label for XARTEMIS XR states that "The recommended dose of XARTEMIS XR is 2 tablets every 12 hours without regard to food." Actavis denies the remaining allegations of Paragraph 19.

20. A physician familiar with the use of extended-release tablets for the management of acute pain such as XARTEMIS™ XR would therefore understand that administration of an opioid analgesic combined with a non-opioid analgesic agent would be subject to the label's instruction to administer a dose twice daily.

ANSWER: Actavis lacks knowledge and information sufficient to form a belief about the truth of the allegations of Paragraph 20, and on that basis, denies them.

21. Plaintiffs have educated prescribing physicians regarding the use of XARTEMIS™ XR. Physicians are informed that the recommended dose of XARTEMIS™ XR is one dose every 12 hours. Physicians are told that the second dose may be administered as early as 8 hours after the initial dose if patients require analgesia at that time. Subsequent doses are to be administered every 12 hours. Further, on information and belief, it is the standard of care for physicians to treat acute pain in a manner that prevents pain break through. One or more claims of the patents in suit cover the method of treating pain by administering oxycodone hydrochloride and acetaminophen extended-release every 8-12 hours or twice daily.

ANSWER: Actavis lacks knowledge and information sufficient to form a belief about the truth of the allegations of Paragraph 21, and on that basis, denies them.

COUNTERCLAIMS

Pursuant to Rule 13 of the Federal Rules of Civil Procedure, Defendant/Counterclaim-Plaintiff Actavis Laboratories FL, Inc. (formerly known as Watson Laboratories, Inc.-Florida) ("Actavis" or "Counterclaim-Plaintiff") asserts the following Counterclaims against Plaintiffs/Counterclaim-Defendants Mallinckrodt LLC, Mallinckrodt Inc. (collectively, "Mallinckrodt") and Depomed, Inc. ("Depomed") (together with Mallinckrodt, "Plaintiffs" or "Counterclaim-Defendants") for declaratory judgment of patent non-infringement and invalidity (or unenforceability), and allege as follows:

THE PARTIES

1. Actavis is a corporation organized under the laws of the State of Florida, having a

principle place of business at 4955 Orange Drive, Fort Lauderdale, FL 33314.

2. On information and belief, and based on Plaintiffs' allegations, Counterclaim-defendant Mallinckrodt LLC is a limited liability company organized and existing under the laws of the State of Delaware, having a place of business at 675 McDonnell Boulevard, Hazelwood, Missouri 63042-2379.

3. On information and belief, and based on Plaintiffs' allegations, Counterclaim-defendant Mallinckrodt Inc. is a corporation organized and existing under the laws of the state of Delaware, having a place of business at 675 McDonnell Boulevard, Hazelwood, Missouri 63042-2379.

4. On information and belief, and based on Plaintiffs' allegations, Counterclaim-defendant Depomed, Inc. is a corporation organized and existing under the laws of the State of California, having a place of business at Gateway Blvd., Suite 300, Newark, CA 94560.

JURISDICTION AND VENUE

5. These Counterclaims arise under the Patent Laws of the United States, 35 U.S.C. § 1 et seq., and the Declaratory Judgment Act, 28 U.S.C. §§ 2201 and 2202.

6. 35 U.S.C. § 271(e)(5) specifically provides that the Court shall have subject matter jurisdiction under 28 U.S.C. § 2201 for a declaratory judgment regarding an unasserted patent listed in the FDA's publication Approved Drug Products with Therapeutic Equivalence Evaluations ("the Orange Book").

7. Because Plaintiffs have filed their Complaint alleging that Actavis has infringed U.S. Patent Nos. 8,597,681 ("the '681 patent"); 8,658,631 ("the '631 patent"); 8,741,885 ("the '885 patent"); 8,980,319 ("the '319 patent"); 8,992,975 ("the '975 patent); 7,976,870 ("the '870 patent"); and 8,668,929 ("the '929 patent") (collectively the "Original Complaint Patents"), Plaintiffs have demonstrated an intent to enforce its patents concerning XARTEMIS™ XR.

8. Plaintiffs have never disavowed, in their Complaint or elsewhere, an intent to assert that Actavis infringes U.S. Patent Nos. 8,372,432 ("the '432 patent"); 8,377,453 ("the '453 patent"); and 8,394,408 ("the '408 patent").

9. Because Plaintiffs caused the FDA to list the '432, '453, and '408, patents in the Orange Book but did not assert those patents in its Complaint, even though the '432, '453, and '408, patents cover the same technology and share substantial content with the Original Complaint Patents, Actavis has a reasonable apprehension that Plaintiffs will sue Actavis for infringement of the '432, '453, and '408 patents.

10. An actual justiciable controversy exists between the parties as to the infringement, invalidity, and/or unenforceability of the '432, '453, and '408 patents.

11. This Court has original jurisdiction over the subject matter of these Counterclaims under 28 U.S.C. §§ 1331 and 1338(a).

12. This Court has personal jurisdiction over Mallinckrodt LLC because Mallinckrodt LLC has availed itself of the rights and privileges, and subjected itself to the jurisdiction, of this forum by suing Actavis in this District, and/or because Mallinckrodt LLC conducts substantial business in this District.

13. This Court has personal jurisdiction over Mallinckrodt Inc. because Mallinckrodt Inc. has availed itself of the rights and privileges, and subjected itself to the jurisdiction, of this forum by suing Actavis in this District, and/or because Mallinckrodt Inc. conducts substantial business in this District.

14. This Court has personal jurisdiction over Depomed, Inc. because Depomed, Inc. has availed itself of the rights and privileges, and subjected itself to the jurisdiction, of this forum by suing Actavis in this District, and/or because Depomed, Inc. conducts substantial business in

this District.

15. Venue is proper in this District under 28 U.S.C. §§ 1391(b) and 1400(b).

FACTUAL BACKGROUND

16. On information and belief, and based on the FDA's website, Mallinckrodt Inc. is the current holder of New Drug Application ("NDA") No. 204031 for the manufacture and sale of XARTEMIS XR (oxycodone hydrochloride and acetaminophen) extended-release tablets.

17. On information and belief, Counterclaim-defendant Mallinckrodt markets oxycodone hydrochloride and acetaminophen extended-release tablets in the United States under the trade name XARTEMIS XR. According to the FDA website, XARTEMIS XR was approved by the FDA on March 11, 2014.

18. On information and belief, and based on Plaintiffs' allegations, Counterclaim-defendant Mallinckrodt is listed as the purported owner of record and purported assignee of the '681,'631, '885, '319, and '975 patents.

19. On information and belief, and based on Plaintiffs' allegations, Counterclaim-defendant Depomed is listed as the purported owner and purported assignee of U.S. Patent Nos. 7,976,870 ("the '870 patent") and 8,668,929 ("the '929 patent").

20. Counterclaim-Defendants have informed the FDA of the unexpired U.S. Patent Nos. 8,597,681 ("the '681 patent"); 8,658,631 ("the '631 patent"), 8,741,885 ("the 885 patent"); 8,980,319 ("the '319 patent"); 8,992,975 ("the '975 patent); 7,976,870 ("the '870 patent"); and 8,668,929 ("the '929 patent"), along with U.S. Patent Nos. 8,372,432 ("the '432 patent"); 8,377,453 ("the '453 patent"); and 8,394,408 ("the '408 patent") (collectively with the Original Complaint Patents, "the XARTEMIS XR Patents") with respect to which a claim of patent infringement could reasonably be asserted if a person not licensed by the owner engaged in the manufacture, use of sale of oxycodone hydrochloride and acetaminophen extended-release

tablets. The ’432, ’453, and ’480 patents, collectively, are the “Declaratory Judgment Patents.” The XARTEMIS XR Patents are listed by the FDA in its publication, Approved Drug Products with Therapeutic Equivalence Evaluations, commonly referred to as the “Orange Book” for the NDA, under 21 U.S.C. § 355(j)(7).

21. On February 12, 2013, the United States Patent and Trademark Office issued the ’432 patent, entitled “Gastric retentive extended-release dosage forms comprising combinations of a non-opioid analgesic and an opioid analgesic.” The ’432 patent was purportedly assigned by inventors Chein-Hsuan Han, Sui Yuen Eddie Hou, and Monica L. Reid to Depomed, Inc. A copy of the ’432 patent is attached hereto as Exhibit B.

22. On February 19, 2013, the United States Patent and Trademark Office issued the ’453 patent, entitled “Gastric retentive extended-release dosage forms comprising combinations of a non-opioid analgesic and an opioid analgesic.” The ’453 patent was purportedly assigned by inventors Chein-Hsuan Han, Sui Yuen Eddie Hou, and Monica L. Reid to Depomed, Inc. A copy of the ’453 patent is attached hereto as Exhibit C.

23. On March 12, 2013, the United States Patent and Trademark Office issued the ’408 patent, entitled “Gastric retentive extended-release dosage forms comprising combinations of a non-opioid analgesic and an opioid analgesic.” The ’408 patent was purportedly assigned by inventors Chein-Hsuan Han, Sui Yuen Eddie Hou, and Monica L. Reid to Depomed, Inc. A copy of the ’408 patent is attached hereto as Exhibit D.

24. On information and belief, Counterclaim-defendant Depomed is listed as the purported owner and purported assignee of the’432, ’453, and ’408 patents.

25. Listing the XARTEMIS XR Patents in the Orange Book is a representation to the world that Counterclaim-Defendants believe these patents purportedly cover oxycodone

hydrochloride and acetaminophen extended-release tablets, and that an infringement suit could be alleged against any generic ANDA applicant, including Counterclaim-Plaintiff, that attempts to seek approval for, and market, a generic version of oxycodone hydrochloride extended release tablets before the patents' expiration.

26. Actavis currently holds Abbreviated New Drug Application ("ANDA") No. 207113 oxycodone hydrochloride and acetaminophen extended-release tablets.

27. Actavis filed certifications under 21 U.S.C. § 355(j)(2)(A)(vii)(IV) ("Paragraph IV Certification") certifying that each of the Declaratory Judgment Patents, in addition to each of the Original Complaint Patents, is invalid, unenforceable, and/or will not be infringed by the manufacture, use, offer for sale, importation, or sale of oxycodone hydrochloride and acetaminophen extended release tablets ("Proposed Product") as covered by ANDA No. 207113. In accordance with 35 U.S.C. § 355(j)(2)(B)(i) and (ii), Actavis sent a letter to Counterclaim-Defendants that provided notice of the Paragraph IV Certifications and provided the factual and legal bases for those Certifications.

28. In connection with the notice to Counterclaim-Defendants of Counterclaim-Plaintiff's Paragraph IV Certification, Actavis provided an offer of confidential access to its ANDA in accordance with 21 U.S.C. § 355(j)(5)(C)(i)(I)(cc) and (III).

29. On June 5, 2015, Counterclaim-Defendants sued Counterclaim-Plaintiff in this district alleging infringement of the Original Complaint Patents based on ANDA No. 207113. Accordingly, there is an actual, substantial, and continuing justiciable case and controversy between Counterclaim-Plaintiff and Counterclaim-Defendants regarding the Original Complaint Patents, over which this Court can and should exercise jurisdiction and declare the rights of the parties.

30. Furthermore, based on, *inter alia*, the listing in the Orange Book of the XARTEMIS XR Patents; Actavis' filing of its ANDA with Paragraph IV Certifications to the XARTEMIS XR Patents, including the patents-in-suit; Actavis' intention to seek approval for its generic oxycodone hydrochloride and acetaminophen tablets before expiration of the XARTEMIS XR Patents; and Counterclaim-Defendants' suit against Counterclaim-Plaintiff for infringement of the Original Complaint Patents there is a continuing case or controversy between Counterclaim-Plaintiff and Counterclaim-Defendants regarding infringement and validity of the Original Complaint Patents.

31. Based on Counterclaim-Defendants suit against Counterclaim-Plaintiff in this district alleging infringement of the Original Complaint Patents based on ANDA No. 207113, there is also a substantial controversy between Counterclaim-Plaintiff and Counterclaim-Defendants with regard to the Declaratory Judgment Patents.

32. The Counterclaim-Plaintiff and Counterclaim-Defendants have adverse legal interests with regard to whether Counterclaim-Plaintiff may market and sell generic oxycodone hydrochloride and acetaminophen tablets before expiration of the XARTEMIS XR Patents, including the Declaratory Judgment Patents.

33. Counterclaim-Defendants Complaint alleges that Counterclaim-Plaintiff's generic oxycodone hydrochloride and acetaminophen tablets infringes the seven Original Complaint Patents. Thus, on information and belief, Counterclaim-Defendants believe that Counterclaim-Plaintiff's generic oxycodone hydrochloride and acetaminophen tablets will infringe at least one claim of each of the Declaratory Judgment Patents.

34. Accordingly, there is an actual, substantial, and continuing justiciable case and controversy between Counterclaim-Plaintiff and Counterclaim-Defendants regarding the

Declaratory Judgment Patents, over which this Court can and should exercise jurisdiction and declare the rights of the parties.

35. Thus, Counterclaim-Plaintiff is statutorily entitled to bring and maintain this action for declaratory judgment pursuant to the Medical Modernization Act in order to obtain patent certainty, in accordance with 21 U.S.C. § 355(j)(5)(C) and 35 U.S.C. § 271(e)(5).

36. As a result of any exclusion of Counterclaim-Plaintiff from the marketplace, Counterclaim-Plaintiff and the public will be irreparably harmed by the potential indefinite delay in the market entry and availability of lower-priced oxycodone hydrochloride and acetaminophen extended-release tablets.

37. This case is exceptional pursuant to 35 U.S.C. § 285 and Counterclaim-Plaintiff is entitled to its reasonable attorney fees pursuant to that statute.

FIRST COUNTERCLAIM
DECLARATORY JUDGMENT OF
NON-INFRINGEMENT OF THE '681 PATENT

38. Counterclaim-Plaintiff re-asserts, re-alleges, and incorporates by reference each of the foregoing Paragraphs of its Defenses and Counterclaims, above, as if fully set forth herein.

39. The manufacture, use, sale, offer for sale, or importation of oxycodone hydrochloride and acetaminophen extended-release tablets that are the subject of ANDA No. 207113 have not infringed, do not infringe, and would not, if marketed, infringe any valid and/or enforceable claim of the '681 patent.

40. Counterclaim-Plaintiff and Counterclaim-Defendants have adverse legal interests, and there is a substantial controversy between Counterclaim-Plaintiff and Counterclaim-Defendants of sufficient immediacy and reality to warrant the issuance of a declaratory judgment regarding the non-infringement of the '681 patent. Therefore, a present, genuine, and justiciable controversy exists between Counterclaim-Plaintiff and Counterclaim-Defendants regarding, *inter*

alia, the infringement of any valid or enforceable claim of the ’681 patent.

41.
